

Arboviral Surveillance Report

September 1st, 2020

Surveillance

This report provides data on Week 35 of surveillance for West Nile virus (WNV) in mosquitoes and includes data on other surveillance indicators. Gravid and BG sentinel traps are placed throughout the City of Chicago and monitored twice a week for the duration of the mosquito-breeding season. For this reporting period, there were twenty-one (21) WNV positive mosquito pools from eighteen (18) traps within the City.
